Professional Experience

Freelance Software Engineer Feb. 2025 – Present
BE CARTH.AI Consulting | React, FastAPI, PostgreSQL, Flutter Hybrid

- Designed and developed a compliant electronic invoicing system (e-Fatoora), including invoice/quote generation, QR code integration, and digital signature.
- Developed a multi-warehouse inventory system with real-time tracking and automated alerts.
- Developed high-performance web and mobile solutions, improving business process automation for SMEs.

Software Engineer Intern Jun. 2025 - Aug. 2025
Zum-IT | Angular, Django, PostgreSQL On-site

- Designed and developed "Zum-Portal", a comprehensive HR management platform integrating client and project tracking, task coordination, event scheduling, leave management, and meeting room reservations.
- Enhanced operational efficiency by optimizing workflows and automating core HR processes, improving overall system usability.

Projects

Diabetic Retinopathy Classification using Domain Generalization Mar. 2025

- Designed a robust deep learning model for diabetic retinopathy classification using domain generalization techniques, leveraging Vision Transformers (ViT) and CLIP-based models to learn domain-invariant representations.
- Evaluated the model on benchmark datasets (EyePACS, APTOS, Messidor) using leave-one-domain-out validation, and developed a simple interface for clinicians to upload retinal images and receive automated diagnostic results.

Tags: Deep Learning / Computer Vision / Domain Generalization / ViT / CLIP

Socially – Social Media Platform Nov. 2025

- Developed "Socially", a full-featured social media platform including user profiles, posts, comments, likes, follower/following system, and real-time notifications.
- Built a fast, scalable, and interactive web application using Next.js, React, and Prisma with PostgreSQL.

Tags: Next.js / React / Prisma / PostgreSQL

Technical Skills

Programming Languages: C/C++, JavaScript, TypeScript, Java, Python, SQL / PL-SQL
Frontend Tools: React.js, Next.js, Angular, Redux, Tailwind, CSS/SCSS
Backend Tools: Nest.js, Express.js, Django, FastAPI, GraphQL, RESTful API, Git/GitHub
Cloud and DevOps: AWS, Docker, Vercel | AWS Certified Cloud Practitioner, AWS Certified AI Practitioner
Technical Expertise: System Design, UML Specification and Design Patterns, OOP, Cryptography, Algorithms

Education

National School of Computer Science (ENSI) Tunis, Tunisia
Engineering Degree in Computer Science 2024 – Present

- Engineering curriculum focused on systems, networks, advanced programming, and algorithms.

Preparatory Institute for Engineering Studies of Nabeul (IPEIN) Nabeul, Tunisia
Preparatory Cycle in Mathematics, Physics & Computer Science 2022 – 2024

- Strong foundation in mathematics, physics, and computer science; ranked 274th out of 1750 in the national entrance exam (Math-Physics track).

Baccalaureate in Mathematics Sousse, Tunisia
Enfidha 1 High School 2022

- Graduated with honors, with solid knowledge in mathematics, physics, and computer science.
